

HAWK UNIFIED NMS

HAWK XE SERIES

Product Model Reference Guide

Document ID: Xe-SERIES-2025
Version: HXV-25.06
Date: June 2025
Status: Official Release

Model Reference Guide

Software Version History

Version	Released	Milestone	Notes
HXV-25.06	Jun 2025	Hawk X Series Update	Stability updates; Xe sub-tier launched alongside X
HXV-26.06	Jun 2026	Scheduled	Under Beta Testing

Sector Classification

The Xe Series is the first Hawk series to fully cover all three deployment sectors. Sector coverage expands progressively across tiers.

Support	Sector	Applicability
Hybrid	IT	Information Technology — managed infrastructure, data centers, enterprise networks
Hybrid	Non-IT	Operational environments less dependent on traditional IT stacks
Hybrid	OT / IoT	Operational Technology & IoT — industrial, edge, and connected device deployments

Sector & Scale Progression

The Xe Series is designed with a deliberate progression — each tier expands both sector coverage and deployment scale.

Model	Sector	Scale	Use Case
XeP4x64	IT, Non-IT & OT-IoT	Enterprise	Multi-site enterprise, industrial OT, IoT backbone
XeP4x64+	IT, Non-IT & OT-IoT	Cluster / Top-Tier	Core data center, cluster orchestration, all sectors
